TECHNICAL ARSENAL

PROGRAMMING LANGUAGES

Python C++ SQL Scala JavaScript
Ruby Java

DATA & CLOUD

PySpark AWS EMR Databricks Hadoop
Hive HBase Azure HDFS Cloudera
SSIS

WEB DEVELOPMENT

Spring Boot Ruby on Rails Angular
HTML5/CSS3

APPLIED SKILLS

Machine Learning Unity Engine

EDUCATION

B.Tech — Information Technology
Institute of Technology, GGV (C.U)
2016 – 2020 | Bilaspur **CGPA: 8.22**

Senior School (XII) — Bihar Board
Quasmi High School
2015 | Gaya **72.60%**

Mozammil Akhtar

Senior Data Engineer

Results-driven Senior Data Engineer with 5+ years of experience specializing in building highly scalable data pipelines, robust data quality frameworks, and optimized parsing engines. Proven track record in orchestrating cloud big data pipelines using PySpark and AWS EMR, migrating legacy mainframe architectures, and delivering modern, high-performance systems for global enterprises.

WORK EXPERIENCE

Senior Data Engineer • Ernst & Young (EY) Feb 2023 – Present | Bangalore

- Engineered advanced distributed data parsers for JSON and XML formats using PySpark, converting large unstructured datasets into optimized structured schemas, reducing storage footprint and improving query speeds.
- Designed and spearheaded the software architecture of a comprehensive Data Quality framework, guaranteeing high-integrity checks, accuracy, and data consistency across key AWS EMR pipeline phases.
- Successfully optimized and migrated legacy mainframe workflows to Python ASCII code with batch processing capabilities, drastically improving runtimes and reducing operational overhead.

Tech Stack: PySpark Python Airflow AWS EMR SQL Hive HDFS Cloudera

Engineer — Data COE • LTIMindtree (formerly Mindtree) Mar 2021 – Feb 2023 | Bangalore

- Collaborated in the Big Data Center of Excellence (COE) team to design, build, and integrate internal developer utility tools, automated workflows, and high-performance ingestion templates.
- Delivered critical digital transformation solutions and agile technology services for Global 2000 clients, improving performance metrics across their enterprise data value chains.

Tech Stack: Spark Scala Python Spring Boot MySQL Angular Java

Intern — Full Stack Developer • eLitmus.com Sep 2020 – Dec 2020 | Bangalore

- Built and deployed user-facing online evaluation and recruitment screening modules on a high-traffic assessment portal, enhancing onboarding efficiency for fresh graduate hires in India.

Tech Stack: Ruby on Rails MySQL JavaScript

KEY PROJECTS

Crowd Estimation of an Area

Designed a computer vision system using Gaussian filters to estimate crowd densities and count individuals from image feeds.

Python • Gaussian Filters • OpenCV

Fingerprint Spoof Detection

Developed a deep learning framework using Generative Adversarial Networks (GANs) and encoder-decoders to classify authentic vs spoofed fingerprints.

Python • GANs • Deep Learning

CERTIFICATES & AWARDS

Databricks Associate Data Engineer databricks.com

CodeChef Certified Data Structures and Algorithms codechef.com

HackerRank 6 Stars in Problem Solving hackerrank.com

Winner — Codeutsava 3.0 Hackathon (NIT Raipur) Built Recommendation System in 28 hrs

Data Structures and Algorithms Specialization (UC San Diego) coursera.org
